*This catalogue has been compiled by Mr. E. F. Strange, an
Assistant Keeper in the Victoria and Albert Museum.*

BY VERA
ANDERSON

NOTE.

At the suggestion of the Phené Spiers Memorial Committee, a list was prepared, during the summer of 1906, of the various measured drawings of architecture, architectural ornament and similar work, which have, from time to time, been reproduced in the principal sketch-books and periodicals devoted to the subject. As the main object of this list was to facilitate the acquisition of the original drawings for the collection now being formed in the Victoria and Albert Museum, under the auspices of the Committee, it was arranged under the draughtsmen's names, and chronologically—according to date of publication. But it was at once seen that if this mass of material could be re-cast into the form of a Topographical Index, its value, not only to architects and students of architecture, but also to all those who are interested in the history of architecture, would be greatly increased. This has now been done, on the lines already laid down in the Indexes to the Section of Prints and Drawings, and the present volume is the result. The entries have been condensed as much as possible, and abbreviations used wherever possible without loss of intelligibility. A list of the sources from which the Index has been compiled is attached. With one or two small exceptions, they can be referred to in the National Art Library; and the deficiencies will be made good as soon as an opportunity occurs.
